Report Format for Final SE Project

Front page with project name and group member names…unique to all groups

Index

I.   Introduction
II.   Problem Statement of the Project
III. Software Requirement Specification (Except Analysis Modeling)
IV.   Data Modeling (if database: ER Diagram or mention the way data is going to be handled in project)
V.   Analysis Modeling (All 5 UML diagrams)
VI.   Software Testing
- Unit Testing: Each Module – Minimum 3 test cases
- CFG for two code snippets (code snippets must be length of 20 statements including loops and iterations)
- System Testing – Minimum 5 test cases
VII. Snapshots of the Project Output
VIII. Importance of the Project

Report should be printed in black and white.

Template for Unit and System Testing

In case of Unit Testing mention Module Name before test case table.

Test Case ID	Test Case Name	Precondition	Post-condition	Action	Expected Output	Pass/Fail	Remarks

Parameters to be evaluated at the time project demonstration:

1. Complexity
2. Mapping of design to implementation
3. Demo/Code/Output
4. Individual Contribution
5. Understanding based Questions and Answers
